**b**

Position-stratified KEGG enrichment
Citrate cycle (TCA cycle)
Glyoxylate and dicarboxylate metab.
Aminoacyl-tRNA biosynth.
Arabinogalactan biosynth.
Teichoic acid biosynth.
Biosynthesis of type II polyketide products
Galactose metab.
Pyruvate metab.
Pyrimidine metab.
Glycine, serine and threonine metab.
Purine metab.
Carbon fixation by Calvin cycle
RNA polymerase
Flagellar assembly
